NEZIORA

BUILDING WHAT'S NEXT

NEZIORA

BRAND BOOK

1. INTRODUCTION

WHO ARE WE

Neziora is a brand built around the future. We create valuable things for the future, and we make them well.

WHAT WE BELIEVE

KNOWLEDGE. Know your craft.

VISION. Look ahead.

CONNECTION. Bring both together.

WHAT WE DO

We build what the FUTURE will need. Whatever we make, we make it to last.

NEZIORA

BUILDING WHAT'S NEXT

THIS BOOK

This brandbook shows how Neziora looks, sounds and behaves, so it stays consistent everywhere.

2. THE LOGO

CORE ELEMENTS

NEZIORA
BUILDING WHAT'S NEXT

1. The Letter N.

   The N is built from three elements, and each stands for one of our beliefs:

   LEFT PILLAR. KNOWLEDGE

   RIGHT PILLAR. VISION

   BRIDGE. CONNECTION

2. The ORBITAL RING AND STAR.

The ring begins on the left and dips to its lowest point before rising toward the bridge of the N. It passes through the bridge, then climbs to the highest point of the mark, where a shining star marks its end.

THE CONCEPT & MEANING

NEZIORA
BUILDING WHAT'S NEXT

BACKSTORY.

Everyone wants to succeed, but few people have a clear path to get there.

Some have KNOWLEDGE and potential, but no VISION of where they are going.

Others have both KNOWLEDGE and VISION, but no plan or process to turn them into results.

THAT'S WHY NEZIORA EXISTS.

CONCEPT ABOUT NEZIORA.

The TWO PILLARS of the N are KNOWLEDGE and VISION, the foundation of any success. Neither is enough alone. NEZIORA is the bridge between them: the connection that turns what we know and what we see into results.

The ORBITAL RING represents the process. Its early dip is an honest part of the story: success never moves in a straight line, and setbacks are part of the journey. The ring passes through the bridge, meaning the process is given direction at NEZIORA, and from there it rises steadily upward. The SHINING STAR is the FUTURE, the point where the journey is meant to arrive.

4. LOGO RULES

Which file to use

File	Use it for
Full Logo	Covers, website header, presentations, letterhead, anywhere there's room
Wordmark with slogan	Wide, short spaces such as banners, email footers, document headers
Logo only	Social profile pictures, app icons, favicon, stamps, small spaces
Dark Version	Black and dark backgrounds
Light Version	White and light backgrounds

Clear space

Keep an empty margin around the logo. Nothing (text, images, edges of the page) may enter it.

- Full logo and wordmark: the margin on every side equals the height of one letter of NEZIORA.
- Mark: the margin equals the width of one white pillar.

Minimum Size

File	Print	Screen
Full Logo	30mm wide	150px wide
Wordmark with slogan	32mm wide	120px wide
Logo Only	8mm wide	24px wide

If the space is smaller than this, switch to the logo only.

Backgrounds

- Use the dark version on dark backgrounds and the light version on light backgrounds. Never put the dark version on white or the light version on black.
- On photos, place the logo only on a calm area with strong contrast. If the area is busy, choose a different position or a solid panel behind it.
- Don't place the logo on a red background, since the red parts would disappear.

NEZIORA
BUILDING WHAT'S NEXT

What not to do

1. Don’t recolor. Only the supplied colors are allowed: white or near-black, and the Neziora red.
2. Don’t stretch or squash. Always scale proportionally, holding Shift when resizing.
3. Don’t add effects. No shadows, glows, outlines, gradients, bevels or 3D.
4. Don’t rotate or tilt the logo.
5. Don’t retype the name in a font or redraw any part.
6. Don’t separate or rearrange the elements, such as moving the star or placing the slogan somewhere else.
7. Don’t change the slogan’s spacing or font.
8. Don’t crop the logo or let it run off the page.

NEZIORA
BUILDING WHAT’S NEXT

5. TYPOGRAPHY

Neziora uses four typefaces, each with one job. All are free on Google Fonts.

Typefaces

Role	Typeface	Style
Display (Section titles, large statements)	Michroma	Regular, Uppercase
Headings	Sora	Semi-Bold
Body Text	Inter	Regular
Slogan and labels	Jost	Light, Uppercase

Why these typefaces

The wordmark is wide, geometric and squared, and the slogan is thin and widely spaced. The type system follows the same two voices: wide and strong for statements, light and open for support.

Hierarchy

Level	Typeface	Size (print / screen)	Notes
Display	Michroma	28 to 36 pt / 32 to 48 px	Uppercase, short text only
Heading 1	Sora Semi-Bold	20 pt / 28 px	Sentence or title case
Heading 2	Sora Semi-Bold	16 pt / 22 px	
Heading 3	Sora Semi-Bold	13 pt / 18 px	
Body	Inter Regular	10.5 to 11 pt / 16 px	Line spacing 1.5
Caption	Inter Regular	9 pt / 13 px	Tables, notes
Label and slogan	Jost Light	8 to 12 pt / 11 to 14 px	Uppercase, letter-spacing +300 to +400

6. COLORS

Neziora's palette is deliberately small: black and white carry the brand, and one red does the work of the spark.

Primary Colors

Color	HEX	RGB	CMYK
Neziora Red	#FC0229	252, 2, 41	0, 99, 84, 1
Neziora Black	#0A0A0A	10, 10, 10	0, 0, 0, 96
White	#FFFFFF	255, 255, 255	0, 0, 0, 0

NEZIORA
BUILDING WHAT'S NEXT

Supporting Colors

Color	HEX	RGB	CMYK (approx.)	Role
Graphite	#1A1A1A	26, 26, 26	0, 0, 0, 90	Cards and panels on dark backgrounds
Steel Gray	#8A8A8A	138, 138, 138	0, 0, 0, 46	Secondary text, captions, page numbers
Light Gray	#F2F2F2	242, 242, 242	0, 0, 0, 5	Panels and tables on light backgrounds

NEZIORA
BUILDING WHAT'S NEXT

Color meaning

- Black is the future we are building into.
- White is clarity and precision.
- Red is the spark: energy, ambition, and the connection that joins the pillars.

Proportions

Roughly 70% black or white, 20% grays, and no more than 10% red. The red works because it is rare. If a page feels loud, remove red.

How to use red

- Use it for small highlights: a key word, a thin rule, a number, a button, an icon.
- Never use it for paragraphs of text or large background areas.

- On small text, don’t use red at all. Its contrast against white is about 4:1, which is fine for large titles and graphics but too weak for body text. Against black it is about 5:1.
- Don’t place the logo on a red background (the red parts disappear).

Rules

1. Use only the colors above in Neziora materials.
2. No gradients, glows or transparency effects on brand colors, matching the logo rules.
3. Pair dark and light consistently: white text on black or graphite, near-black text on white or light gray.
4. Don’t introduce new accent colors. If a design needs more variety, use more white space, not more color.

NEZIORA
BUILDING WHAT’S NEXT

For print

- CMYK values above are approximations. This red is very bright and sits at the edge of what CMYK can print, so request a printed proof before any large run.
- If you print in volume, ask your printer to match it with a spot color. Pantone 185 C is a common reference point, but it is duller, so judge it against your proof.
- For large black areas, ask the printer for a rich black instead of 96% K alone.

7. FOUNDER

UDITHA MANOHARA PRASAD

FOUNDER, NEZIORA

About

He founded Neziora to build technology the world can depend on. Trained in software engineering, he leads the company's direction, standards and long-term vision.

NEZIORA
BUILDING WHAT'S NEXT

Why started Neziora

Technology moves fast, and most of it is built for the moment. I believe real value comes from joining deep knowledge with long-term vision, and from building with the care to last. Neziora exists to do that.

Founder's Vision

TO BUILD TECHNOLOGY THE WORLD CAN DEPEND ON
